WINDOW FASHIONS

We understand that your home is a reflection of your style and taste.

Blinds offer a range of window fashions to suit unusual window shapes and sizes enabling you to create the right environment within your home, whatever your style.

ROLLERSHADES provide the most versatile window cover solutions for your home. From transparency and complete blackout to UV light filtering, rollershades offer numerous options for style, texture, size and weight.

Sunscreen rollershades are so versatile that protecting your home from the sun will never mean compromising on style.

LUXAFLEX DUETTE® SHADES are made from a unique cellular honeycomb fabric made from spun bonded polyester, making them one of the most energy efficient window coverings available, with insulating results similar to a double glazed window! With no seams Duette® are well suited for large windows and unusual custom window spaces eg, arched, circular (static only), angled windows and skylights.

LUXAFLEX WOODMATES® VENETIANS Giving the look and feel of wood, these venetians are made from 100% polyresin providing improved durability and strength over a true wood venetian blind. The slats are available in two sizes, they are resistant to heat, humidity and are UV protected.

LUXAFLEX COUNTRYWOOD® TIMBER VENETIANS offer a range of grain, pattern and colour options giving a pure wood finish and natural look to your home. The slats are adjustable providing light and heat control. In addition, the slats are available in a variety of sizes from traditional thin slats to extra wide for a more contemporary look.

LUXAFLEX® ALUMINIUM VENETIANS let you control light, shade, ventilation and privacy in a second. These high quality shades are resistant to scratching, corrosion, peeling, dulling and discolouration.

The huge range of finishes and sizes make aluminium venetians one of the most versatile choices of blinds. Not only that but Luxaflex® aluminium venetians are manufactured from up to 97% recycled material, making them an ecologically friendly choice!

Various perforation options are also available allowing you to choose the shade solution suitable for different facade orientations.

VERTICAL BLINDS are a great choice for large or sloping windows. Available in various fabrics from translucent to total blackout. With multiple stacking options including one way draw to the left or right, two way draw or centre stacking, Luxaflex® vertical blinds offer a narrower stack back allowing more glass to be exposed when blinds are open.

ROMAN BLINDS The functional and practical aspects of roman blinds are complimented by the vast array of fabric options, giving the benefit of colour, pattern, texture and co-ordination to a room. Luxaflex® roman blinds can be fitted in the window reveal with no gaps between panels making them an especially heat efficient choice for your home.

PLEATED BLINDS have a neat, stacked look lending a contemporary, minimal appearance to rooms. Pleated blinds can be used for a wide variety of window shapes and sizes including skylights, arched and triangular. Luxaflex® pleated blinds use fabric that has a metallised backing to insulate your window against the heat of the summer sun, conversely they help retain warmth during the cold winter months.

how to care for your blinds

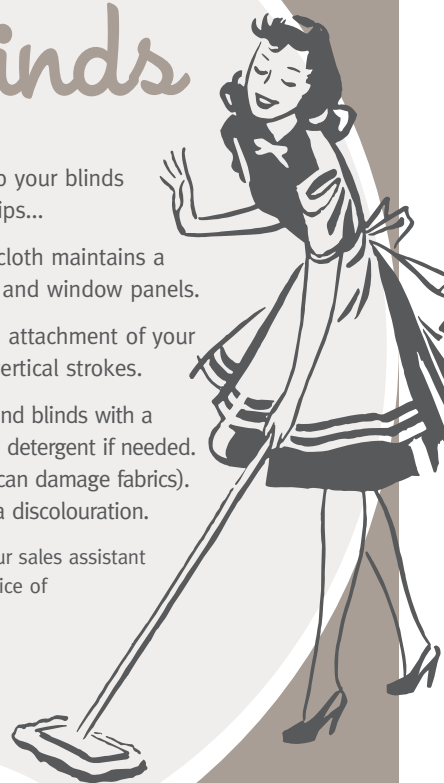

Blinds in general are easy to clean and care for. Keep your blinds looking as good as new with the following tips...

DUST Regular light dusting with a feather duster or soft cloth maintains a like-new appearance of most blinds, shades, sheer, shutters and window panels.

VACUUM For deeper cleaning, vacuum gently with the brush attachment of your vacuum cleaner. Most blinds can be vacuumed using vertical strokes.

SPOT CLEANING Clean small areas and stains on shades and blinds with a soft cloth or sponge moistened with lukewarm water. Add mild detergent if needed. Blot gently to avoid creasing or damaging the fabric (rubbing can damage fabrics). Spot cleaning may result in cleaner areas which show as a discolouration.

Note certain fabrics may not be suitable for spot cleaning, your sales assistant will be able to advise if spot cleaning on your choice of blind / fabric is not recommended.

need to know

Child safety is a serious consideration when choosing blinds and curtains for your home. There are many child safety options available so check these with your retailer to ensure you make the best choice for your family.

All Luxaflex® blinds are custom made to your exact window requirements. Luxaflex® have a range of products to fit difficult shaped windows, such as arched, circular and skylight. Privacy and light control may be defining factors in your choice of blind. The options range from complete blackout to transparency. Ask your retailer what is best for your window space and room.

If you need high levels of UV protection in your blinds Luxaflex® provide highest standards of colourfastness and include a comprehensive guarantee.

When choosing a member of the Professional Drape Group to make your curtains and blinds, you can rest assured that you are working with a company that has your best interests at heart. Our members are window fashion design experts, they offer reliability, a quality guarantee and the industry knowledge to ensure that you get the best possible results. Selecting a member of the Professional Drape Group for your job will take the stress out of choosing the best window décor for your home.
